

Using your notes about the English taxes on the colonies, you and your partner will answer the following:

- Out of all the taxes you learned about, which tax, in your opinion, was the worst tax the English created. Explain why.
- Now, pretend you are a British representative of the king. Come up with three new and original taxes you would have created for the colonists *instead* of the ones you learned about.
 - Each of your taxes must have a name, clear details about the tax, and a reason *why* each tax is better than what the English created.
- Finally, detail two (2) things you would have done differently to make sure the colonists would be more accepting of paying taxes.
